

FORMALDEHYDE DECLARATION OF CONFORMITY

BREL Nederland B.V.
Voltastraat 86A, 7006 RW Doetinchem, The Netherlands

This declaration is based on TÜV SÜD Test Report No. 87.400.26.1011.01-00.01 Rev. 00 dated 14 September 2026. The tested products were tubular motors, model DV55SA-2*9.5/26 and DM45S-20/15. The examination covered formaldehyde emissions for articles other than furniture and wood-based articles according to Regulation (EC) No. 1907/2006 (REACH), Annex XVII, Entry 77.

Declaration
Based on the referenced test report, BREL Nederland B.V. declares that the tested tubular motor products comply with the formaldehyde emission requirement applicable to articles other than furniture and wood-based articles under REACH Annex XVII, Entry 77. The applicable limit is 0.080 mg/m³ under the test conditions used in the report.

Test results		
Model	Result	Conclusion
DV55SA-2*9.5/26	Additional indoor air concentration: 0.003 mg/m ³	✓
DM45S-20/15	Formaldehyde: not detected (ND)	✓

Scope of Testing and Declaration
The tubular motor models DV55SA-2*9.5/26 and DM45S-20/15 were tested and found to comply with the formaldehyde emission requirements of REACH Annex XVII, Entry 77.

Based on the comparable materials, components and manufacturing processes used across our tubular motor range, BREL Nederland B.V. considers the test results representative of its other tubular motor models and declares that these models also meet the applicable formaldehyde emission requirements.

The laboratory test results relate exclusively to the samples covered by TÜV SÜD Test Report No. 87.400.26.1011.01-00.01. The declaration regarding other tubular motor models is based on BREL Nederland B.V.'s assessment of their comparability with the tested models.
